Recruiting Manager

SPX Corporation

13515 Bellantye Corporate Place

Charlotte, NC 28277

February 25, 2026

Dear Recruiting Manager:

I am writing to express my interest in the Software Engineering intern position at SPX corporation. As a second-year pursuing a Bachelor of Science in Computer Science, with minors in Mathematics and Secure Computing and Networks, and as a member of the Burnett Honors College at the University of Central Florida, I maintain a 3.8 GPA and am eager to contribute to SPX's engineering team through hands-on work in unit testing, tool development, and documentation.

My most relevant experience comes from my internship with Palm Beach County Human Services, where I developed and maintained web applications that were used by case management staff, requiring me to coordinate with non-technical department heads. I documented my code in a detailed manner in order to allow others to build directly on top of it once my internship was completed. Similarly, at the UCF CabLab, I implemented modular components in Rust for a peer to peer data sharing network that requires rigorous testing to ensure and validate correctness across a distributed environment.

Beyond these formal roles, I have also developed multiple hackathon projects, including a meeting coordination app and contact manager, both of which were part of the 36-hour KnightHacks competition. These experiences reflect the self-directed and improvement mindset that SPX is looking for. I have hands-on experience with Git, Linux, various programming languages, and Microsoft Office products.

You may contact me at 123-456-7890 or [gandhi@ucf.edu](mailto:gandhi@ucf.edu), and am looking forward to discussing further with you and your team. Thank you for your time and consideration.

Sincerely,

A handwritten signature in black ink, appearing to read 'Nishant', written in a cursive style.
